There are three ways of creating a telemarketing list and usually, one of them is better than the other: Self-Made Phone Number Lists, Phone Number Extraction Tools, and Bought or Rented list.

## What are the ways to build a real phone number list?

To begin successful telemarketing a business needs to have real and relevant telemarketing lists. That brings many business owners to a halt with questions; **How do I get a valid and relevant phone number list for telemarketing?** Is it necessary to have a huge list before starting a telemarketing campaign?

There are three ways of creating a telemarketing list and usually, one of them is better than the other: Self-Made Phone Number Lists, Phone Number Extraction Tools, and Bought or Rented list.

### 1. Self Made Phone Number Lists

Self-Collected Phone Number List is a list that you have collected yourself through different websites using search engines like Google, Yahoo, Bing, and many more. You can find and collect phone numbers from business directories such as Yelp, Yellow Pages, and

many more. Simply, you have to search for the targeted business on these directories and then you can copy-paste all details of that business on your computer. In this manner, you can search for phone numbers on social media sites also. This is a slower method of **growing your cell phone number list** but it is so much better; more targeted, up to date, and permission-based.

## 2. Phone Number Data Collection Tools

---

Mobile Number Data Collection Tools are the **best, cheap, and fastest ways** to grow your telemarketing lists. To survive in this competitive business world, these Phone Number Finder Tools are the best for any call center or telemarketer to get real and accurate phone number lists for calling. There is a powerful Phone Scraper called **Cute Web Phone Number Extractor** used in telemarketing. This **Phone Number Crawler** crawls the public phone numbers from various websites. You can get thousands of targeted phone lists in a day by using this number extractor software. This **Phone Number Extractor** can be used in many fields for mobile number lists such as Real Estate, Home Owners, Business Owners, Marketing Agencies, Freelancing, Restaurants, and many more. By using this Phone Number Grabber, you can download the phone number database from the internet to your computer in various formats such as CSV, Excel, Text, etc.

## 3. Buying Telemarketing Lists

---

Buying phone leads lists is a list that you pay for to a company that has collected huge amounts of mobile numbers. The problem with these lists is that you don't really know who these people are or if the cell numbers are even real and business-related. Definitely, they are not very targeted and have not had any contact with you in the past. The downside of using a bought list is also that it is easily regarded as spam. No one wants to get reported for spamming. **Getting blacklisted** means the end of telemarketing!
